How long are drugs detected in the system?

It depends upon the testing method, body size and type and the drug to be detected. The following is a guideline and is only approximate.

Urinalysis Testing:

Marijuana – 3-5-days to several weeks

Amphetamines – Methamphetamine –Extacy – 2-5 days.

Cocaine – 1-2 Days

Opiates (Heroine) – 3-5 Days

PCP- 1-7 Days

Saliva Testing:

Marijuana – less than 12 hours

Amphetamines – Methamphetamine –Extacy – 2-3 days

Cocaine – 1-2 Days

Opiates – 2-3 Days

PCP – 2-3 Days

How accurate are Urine and Saliva Drug

Screens? The only test that is 100% accurate is a lab based GCMS confirmation that costs \$50.00 to \$75.00 per drug. These instant tests have been confirmed by GCMS confirmations and are between 97% and 99% accurate, depending on the drug.

Hair Testing – Measures Marijuana, Amphetamines, Methamphetamine, Extacy, Cocaine, Opiates, and usage for 90 days and must be collected by a professional collector.

How long is Alcohol in the system? User who has drank for several hours, or had 6-10 beers or 3-5 drinks over a few hours will be intoxicated for around 10-15 hours.

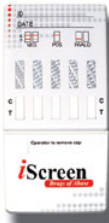

DOT versus Non-DOT: DOT test are for federally regulated Truck drivers, Airplane pilots and safety sensitive employee's as mandated by Department of Transportation and must be collected by a certified DOT collector. Any collector or employer can collect non-Dot.
